Information Security and Assurance Center Charter
September 2010
Updated May 2015

Davenport University and the College of Technology are committed to promoting the practice of protecting information. The Information Security and Assurance Center is charged with furthering this process. The center will see to these through partnerships, support information security research and assist in the development and sharing of resources.

Establish Partnerships

The University will seek to establish and foster partnerships with industry, educational institutions and professional organizations with the goals of:

- Increasing education, training and awareness of information security
- Sharing information security resources
- promoting the practice of information assurance

Support Information Security Research

The University will support research efforts in information security and assurance including:

- Faculty participation in information assurance research and sharing of results
- student research centered on information security/assurance topics
- Participate with other groups/organizations to further their research efforts

Assist Development and Sharing of Resources

The University will seek various methods to develop and disseminate resources of focus that promote information security including:

- Resources used in or developed for class projects
- Best practices for teaching information security and assurance
- Presentations for security training education and awareness
